UiS - Research Fellow Position in Information Technology 2017

Descrição

The University of Stavanger (UiS) has about 10,700 students and 1,560 employees. The University is located in the third largest urban region in Norway, with a dynamic labor market and exciting cultural and leisure activities. It will be a driving force in the development of knowledge in the region, and an international research university with an emphasis on innovation.

The UiS invites applications for [Research Fellow Position in Information Technology](#) at Department of Electrical Engineering and Computer Science. There will be two-four positions in context of the Energy Informatics project: "Data Driven Smart Community Neighborhoods".

Data Limite

May 31, 2017.

Elegibilidade

Applicants must have (or expect to have by Autumn 2017) a strong academic background with a five-year master degree within computer science, informatics, ICT based smart energy systems or a related discipline, preferably recently, or possess corresponding qualifications which could provide a basis for successfully completing a doctorate.

The research fellow must have a good command of both oral and written English.

Note: The University is committed to a policy of equal opportunity in its employment practices. The University currently employs few female research fellows within this academic field and women are therefore particularly encouraged to apply.

Benefícios

NOK435,500.00 per annum.

Forma de Solicitação

The application must be submitted [Online](#).
